

HackTheBox – Pusheen Just Loves Graphs Write Up

Tools:

- IDA Pro

Walkthrough:

Step	Description
1	Unzip the file from the zip file. The file extracted from the zip file is “pusheen”.
2	<p>Pusheen just loves graphs, Graphs and IDA. Did you know cats are weirdly controlling about their reverse engineering tools? Pusheen just won't use anything except IDA.</p> <p>Based on the description, the word “IDA” is a hint leading to IDA Pro which is a disassembly tool.</p>
3	In IDA Pro, the program will prompt us upon loading the “Pusheen” file about the max nodes are not enough to load.
4	Go to Options → General → Graph Tab in IDA Pro to adjust the number of max nodes. (In this case, set the max nodes to 10,000).
5	The flag will be displayed in the Graph Overview Window.

Flag is HTB{Please decrypt yourself ☺}
