HackTheBox – Took the byte Write Up

Tools: Cyberchef (https://gchq.github.io/CyberChef)

Walkthrough:

Step	Description
1	Upload the "password" file to CyberChef
2	Select XOR recipe and type the key "FF" and the file output will be displayed.
3	Based on the output displayed, the header PK shows that it is a zip file. Save the file from CyberChef as "download.zip" file.
4	The contents of the "download.zip" file was extracted and "password.txt" was discovered.
5	The text file extracted contains the flag.

Flag is HTB{Please find the flag yourself ☺}
